

GRANULATE SPREADERS

421

- 1 Large filling and cleaning aperture
- 2 Tight dust cap prevents the ingress of dust
- 3 Shoulder strap
- 4 Large 9 litre tank
- 5 Robust integral agitator
- 6 Spreader disc with large fins for excellent filling with granulate and even application
- 7 Easy-to-operate manual crank

Seeds, fertiliser (e.g. after scarifying), gritting salt, oil absorbers, cleaning agents, pelletised lime, bird seed, stock feed, sand, fire ants, etc.

The integral agitator ensures even distribution onto the steadily rotating spreader disc driven by the manual crank.

Up to 9 kg of granulated matter can be applied where specifically required, even on difficult terrain – for example where a wheeled appliance would be unsuitable.

The spreader is carried in front of the body by means of an adjustable strap. The large hopper aperture makes filling easy, whilst the large screw top protects users from harmful dust.

Granomax

- 1 The spreader allows (due to the clever geometry) even spreading in any situation
- 2 5-stage flow rate control allows an accurate dosing
- 3 Viewing window granule flow
- 4 Dust proof 6.5 litre bag (approx. 5 kg granular fertilizer) bag with large opening and zip closure
- 5 The clever carrying system enables by simply shifting the bag/belt. A continuously and uncomplicated adjustment of the spreader height

The application is in the principle. Pull the Granomax around your back and start spreading. Spot treat, broad cast, in small corners of your garden lawn areas, paths and driveways – and many more applications.

The unique designed spread head guarantees an even spreading of a wide range of materials.

With easy lateral movements, width up to 2 m can be evenly covered with spreading material.

With Granomax, spreading becomes as easy as watering plants.
